

Preventive, cost-effective, diabetic retinopathy analysis

Retmarker provides a clinically validated report that helps diabetics to avoid blindness.

Exceptional Service

Combining superior technology and world-leading expertise, the system enables diabetics to accurately monitor and more easily control their symptoms and prevent blindness.

Better Patient Care

Patients are reminded to return for a repeat examination and the system also notifies healthcare practitioners when patients have exceeded the recommended follow-up period.

Fundus Camera Integration

Integrates seamlessly with all known fundus camera equipment. Image import does not require any significant change to the current work flow.

Affordable Pricing Structure

Number of analysis	Total cost
52 analyses (1 analysis per week)	Please contact us
104 analyses (2 analyses per week)	
260 analyses (5 analyses per week)
